The CT Scanner: The Beatles greatest gift to mankind?

An illustrated talk by Glenn Dunaway of the Mary Rose Trust

Emsworth Community Centre

Thursday, February 1st

7.30pm (doors open at 7pm)

Presented by Dr. Ben Timmis

Although we take modern medical technology for granted, the CT Scanner, invented by an Englishman, is a truly extraordinary machine, that has had a huge impact on the practice of medicine as we know it today, ever since it was introduced in the 1980s. This talk will explain the origins.

Tickets: £5.00 each - All seats are unreserved

Available only from **Bookends**, 7 High Street, Emsworth

Please note that in an effort to reduce the risk of Covid, the organisers have limited ticket numbers to allow better spacing between the seats and request, as a condition of purchasing tickets that the buyers agree to mask wearing in the venue and during the presentations.
